SCIENTIFIC AMERICAN

DAWN OF THE AGE OF ROBOTS

Bill Gates writes that every home will soon have smart mobile devices

If This Is a PLANET, Then Why Isn't Pluto?

A ROBOT IN EVERY HOME

The leader of the PC revolution predicts that the next hot field will be robotics

Scientific American
January 2007

By Bill Gates

In a rapidly changing planet at the birth of a new industry, it is an opportunity for an era of great creativity and innovation.

COMPUTER TEST-DRIVE of a mobile device in a three-dimensional virtual environment helps robot builders analyze and adjust the capabilities of their designs before trying them out in the real world. Part of the Microsoft Robotics Studio software development kit, this tool simulates the effects of forces such as gravity and friction.

VEHÍCULOS AUTÔNOMOS

A Universidade do Vale do Rio dos Sinos - UNISINOS possui um grupo de pesquisa de nome: *Veículos Autônomos*.

Este grupo multidisciplinar, envolvendo pesquisadores dos Cursos de Engenharia Elétrica, Engenharia da Computação, Engenharia Mecânica, Engenharia Civil e do Programa Interdisciplinar de Pós-Graduação em Computação Aplicada (PPGA), desenvolve sistemas de automação veicular em veículos inteligentes, que podem, por exemplo, mover-se de forma completamente autônoma.

Para alcançar este objetivo maior, diferentes sub-sistemas e tecnologias são desenvolvidos, muitos destes através de parcerias com a indústria.

Dentre os objetivos dos diferentes projetos desenvolvidos pelo grupo destacam-se:

- Desenvolvimento de tecnologia *Drive-by-Wire*.
- Desenvolvimento de Sistemas de Apoio ao Motorista.
- Desenvolvimento de Sistemas de Supervisão e Controle Remoto.
- Aplicações de *Inteligência Artificial* em robótica móvel.
- Aumento de segurança na estrada.
- Exploração de locais de difícil acesso.
- Inspeções em ambientes de risco à saúde humana.
- Automatização de sistemas de transporte.
- Automação rural.

Os projetos aqui apresentados visam analisar os diversos tipos de sensores, atuadores, sistemas de controle, sistemas de redes e eletrônica embarcada a serem implementados em Veículos Autônomos.
